**OBGYN Alignment Check Index is live!**
The OBGYN Alignment Check Index (ACI), developed in collaboration with the OBGYN specialty and FREIDA™, the AMA Residency and Fellowship Database®, is a complimentary tool that allows residency applicants to compare their experiences and characteristics to the domains that participating OBGYN residency programs consider in their own residency selection. The ACI tool creates an alignment index that applicants can use in helping them determine which programs to apply to. Learn more at [https://freida.ama-assn.org/residency-alignment](https://freida.ama-assn.org/residency-alignment)

**Final Preparation of your OBGYN Residency Application Question and Answer Webinar**
**Tuesday August 23rd at 7pm.**
We will cover how to use ACI, Altus update, how to choose where to train and answer any questions. Please register here [https://us06web.zoom.us/webinar/register/WN_d6BqfGAUSRa8w2YxpFLWzA](https://us06web.zoom.us/webinar/register/WN_d6BqfGAUSRa8w2YxpFLWzA)

**OBGYN Standards and Altus Update**

The List of Programs participating in the Standards to the OBGYN Interview and Application Process and Program Signaling is continually updated on the APGO RRR website. Included in this spreadsheet are the over 20 residency programs who have opted to use ALTUS for their residency selection process. Updated information about the ALTUS testing is also available on the ALTUS website, this summary podcast and additional information about test preparation

**Program Signaling**

Program Signaling in Obstetrics and Gynecology is offered through the AAMC Supplemental App, and the deadline for applicants to submit their Program Signals is September 16th. Although other specialties are requiring additional information through the Supplemental App, Program Signaling is the only component that will be included for OBGYN applicants. Additional information about the Supplemental App is available [here](https://freida.ama-assn.org/residency-alignment).

Please follow us on the RRR website for updates and download the RRR App where you can receive push notifications on any updates.
